DETAILED ACTION

Allowable Subject Matter

Claims 1-19, 21-25, 59-66, 69, 73-75 and 83-87 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 12, 18, 23, 59, 69 and 85.

Specifically regarding claims 1, 12 and 59, Haeberle et al. teaches the state of the art of an array of electro-magnetically actuated MEMS devices.

But, Haeberle et al. fails to explicitly teach the combination of a mirror, gimbal and first and second coil pairs on the mirror, as claimed.

Specifically regarding claims 18, 69 and 85, Haeberle et al. teaches the state of the art of an array of electro-magnetically actuated MEMS devices.

But, Haeberle et al. fails to explicitly teach an array of magnets positioned along a plane parallel to said substrate, said array of magnets including magnets along each row of devices having a pole direction parallel to said substrate, and magnets between each row of devices having a pole direction perpendicular to said substrate such that said devices are within a magnetic field produced by said array of magnets, as claimed.

Specifically regarding claim 23, Haeberle et al. teaches the state of the art of an array of electro-magnetically actuated MEMS devices.

But, Haeberle et al. fails to explicitly teach an array of magnets positioned along a plane parallel to said substrate, said array of magnets including magnets along each row of devices having a pole direction parallel to said substrate, and magnets between each row of devices having a pole direction perpendicular to said substrate such that said devices are within a magnetic field produced by said array of magnets, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph P. Martinez whose telephone number is 571-272-2335. The examiner can normally be reached on M-F 7:00 AM to 3:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Y. Epps can be reached on 571-272-2328. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
